

Install Postman and Import Request Collection:

The easiest way to get started using the API is to use our Postman request collection. Postman is a free-to-download tool for making HTTP requests. The following steps outline the necessary actions in order for you to install Postman and gain certainty that everything is working as it should be.

Install Postman:

Visit www.getpostman.com and download the version of Postman required for your platform
Install Postman

Import Request Collection:

- Within the attached files locate Fawasell.postman_collection.json
- Open Postman
- Click Import, click Choose Files and specify Fawasell.postman_collection.json.
- An import success message appears for each collection imported

API Keys and Security:

Entry Point: <http://stg.api.fawasell.com/v1/>

App ID: 14378174

App Secret: cFJiGxZVTGf3rPNMK1o08WQWWpnr8M9RmZOyGxcM

Hash Key: diBIGrtVCAH00GtMVLupirbNdFEjooqk8YPJUtUw

Signature Calculation:

You can get signature by combining parameter's values with the hash key, then use md5 to hash the string. The output for the hash function is the signature. For example:

http://stg.api.fawasell.com/v1/posts?category=1&sort=recent&page=1&limit=10&app_id=14378174&app_secret=cFJiGxZVTGf3rPNMK1o08WQWWpnr8M9RmZOyGxcM

Signature = md5(1recent11014378174cFJiGxZVTGf3rPNMK1o08WQWWpnr8M9RmZOyGxcMdiBIGrtVCAH00GtMVLupirbNdFEjooqk8YPJUtUw).

The value highlighted in yellow is the hash key.
